

Hello, MetaLab

I'm Nick Adams, a Designer with about 10 years of experience designing everything from design systems to web and mobile apps.

I'd love to be a part of your team.

Who Am I?

Most recently I've been a Product Designer at Hudl. I've been there for 6+ years where I've worked on a wide variety of projects — web, mobile, design systems, design ops, user research, etc.

Why Am I Applying?

I've always admired MetaLab. Not just the quality of the work, but the way the company is run. All of which makes me a little intimidated applying – especially since the last time I applied to a job was over 6 years ago 😬.

Despite that, I'm going for it. I would love the opportunity to talk through some of my work and my recent experience to see if it's a good fit. Why? I want to work on a team where I can be surrounded by talented designers who are committed to doing good work. I want to learn and collaborate. I want to work at a place where I believe in what they are doing. I want some new challenges and I want to improve as a designer. I feel that MetaLab is a place where this is possible.

I have experience both working with clients (I started a design consultancy after college), and working at a product company (one that grew from 50 people when I started, to over 1300 currently). I have experience working on mobile apps, web apps, and design systems and infrastructure. I'm as comfortable in a text editor as a design tool. I've also been working remotely for over 8+ and I love that environment.

I'd love the opportunity to talk some more about my experience and approach to design. I have a lot of projects I can work through in detail.

Thank you for your time and consideration!

— Nick Adams
