

Hello, Abstract

I'm Nick Adams, a Designer with about 10 years of experience designing everything from design systems to web and mobile apps.

I'd love to be a part of your team.

Who Am I?

Most recently I've been a Product Designer at Hudl. I've been there for 6+ years where I've worked on a wide variety of projects — web, mobile, design systems, design ops, user research, etc.

Why Am I Applying?

The product and team you have put together is impressive. Being a small part of that would be a real opportunity. That combined with the product space is extremely exciting to me.

I've been on a design team that has grown from 3 to 30 over the past 6+ years. We've run into a ton of workflow and tooling and process issues that are ripe for solving. I have spent hours thinking about and debating and being frustrated by these. I don't think Abstract can or should solve all of them, but it has a chance to solve a great deal of them.

Being able to work on those solutions is an opportunity I couldn't pass up. In general, I'm hoping to return to a small dedicated product team who is lean and focused and collaborative. I want to build what I design. I want to talk about data models as much as typography. I want to learn frameworks as much as design tools. I like to think in systems and create better workflows, and I want to be able to communicate and collaborate with engineering.

From the outside, it seems like Abstract is that kind of place. I'd love the opportunity to talk more about my experience and skill set to see if I'd be a good fit.

Thank you for your time and consideration!

— Nick Adams
